

The example below assumes that you enter Seattle University with junior standing (90 credits), have earned a transferable associate degree, and completed:

- One year each of General Biology with labs and General Chemistry with labs, and 1 quarter of Calculus (may be Calculus for Life Sciences or Business)
- Students with an Associate of Science – Transfer (AS-T) degree may have additional core requirements depending on community college coursework.

Visit the Transfer Equivalency Guide on the Transfer Tools site for more information on how your credits may transfer to SU: <https://www.seattleu.edu/registrar/transfer-tools/>. Some courses not listed on the Transfer Equivalency Guide may still transfer to SU. For courses not found on this tool, compare course descriptions with SU's course catalog to determine equivalent courses at your college/university: <http://catalog.seattleu.edu/>
