### Weather

Seattle is famous for its rain, but visitors are often surprised to find that most of our summer days here in Seattle are warm and sunny! Although the average temperature is in the low 70s, we want to prepare you for the possibility of some weeks having summer temperatures reaching 90°F or higher with no air-conditioning.

Ask us about your options for beating the heat! Fans are available for a small fee at the front desks of the residence halls, and our recreational swimming pool is popular during the summer months.
