

Intercom

Intercom allows you to place and receive one-way calls using a dedicated intercom line.

When you place an intercom call, the recipient's phone auto-answers with mute activated (*whisper*) and broadcasts your message through the recipient's speakerphone—or through the headset or handset, if one of these devices is active.

After receiving the intercom call, the recipient can initiate two-way audio (*connected*) to continue the call.

Place an Intercom Call

1. Press the **Intercom** button.

If your phone auto-dials the intercom code, begin speaking after the alert tone. Otherwise, go to Step 2.

2. Enter the intercom code and begin speaking after the alert tone.

Receive an Intercom Call

When you receive an intercom call, you hear an intercom-alert tone and your phone auto-answers the call. Any current call activity that you are engaged in continues simultaneously, but the intercom caller cannot hear you.

To speak to the intercom caller, press the active **Intercom** button.
